

Fastest Invoice Funding

Pay your own bills now!
Why wait for your customers to pay your invoices?

Introducing Extranet Factoring

Invoice factoring is an ancient, paper-based business model that has hardly changed since its inception centuries ago.

Here's how the other factoring companies operate

- You mail the invoice factoring company your paper invoices.
- The invoice factoring company manually verifies, stamps and mails the invoices. Very time consuming.
- The invoice factoring company's collection department hammers your customers on the phone for payment.

The Invoice Factoring Game-Changer

Our Exclusive Paperless, Factoring Extranet is a secure, password protected website where you, your customers and our personnel, collaborate virtually, in real-time, in the entire invoice factoring process. Think of it as all 3 parties working in the same virtual office. The result? The fastest invoice funding in the invoice factoring industry.
